

HOW TO CUSTOMIZE KIOSK MENU VISUALS

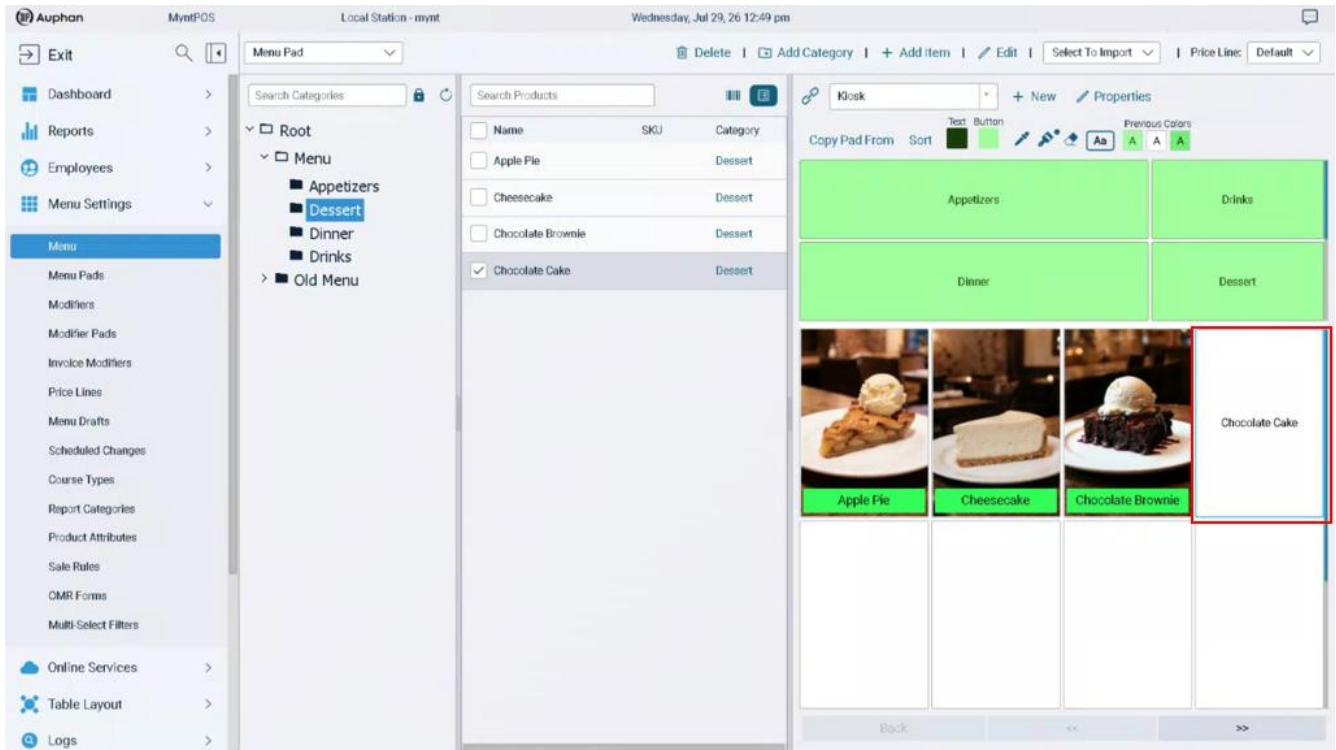

MYNT CORE & ENTERPRISE

This Is a step-by-step guide on how to change the Kiosk menu visuals in Mynt.

Navigate to the Kiosk Menu Editor.

Images are very important for the overall look and feel of a Kiosk menu. Begin by opening an item.

“Chocolate Cake” will be used as an example for this guide.

The image is now added, but the text is very difficult to read, giving an unprofessional look. Select the “Aa” box above the Menu Pad, and press the item that needs to be updated.

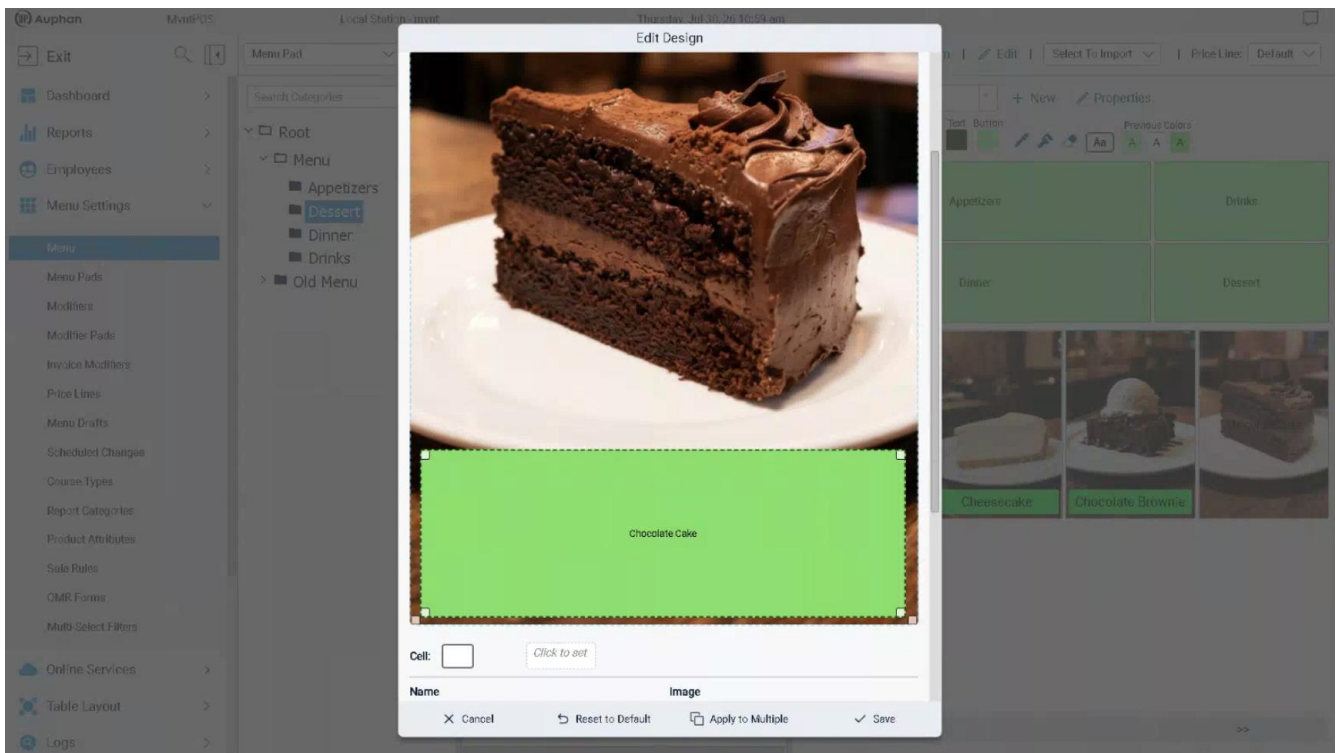

This will open the Icon Editor for the item. The textbox is selected on-screen but is very difficult to see due to the color. Scroll down in order to edit this.

The color box on the left is the color of the Text. The color box on the right is the color of the background. For this demonstration, select the background color box and update this color.

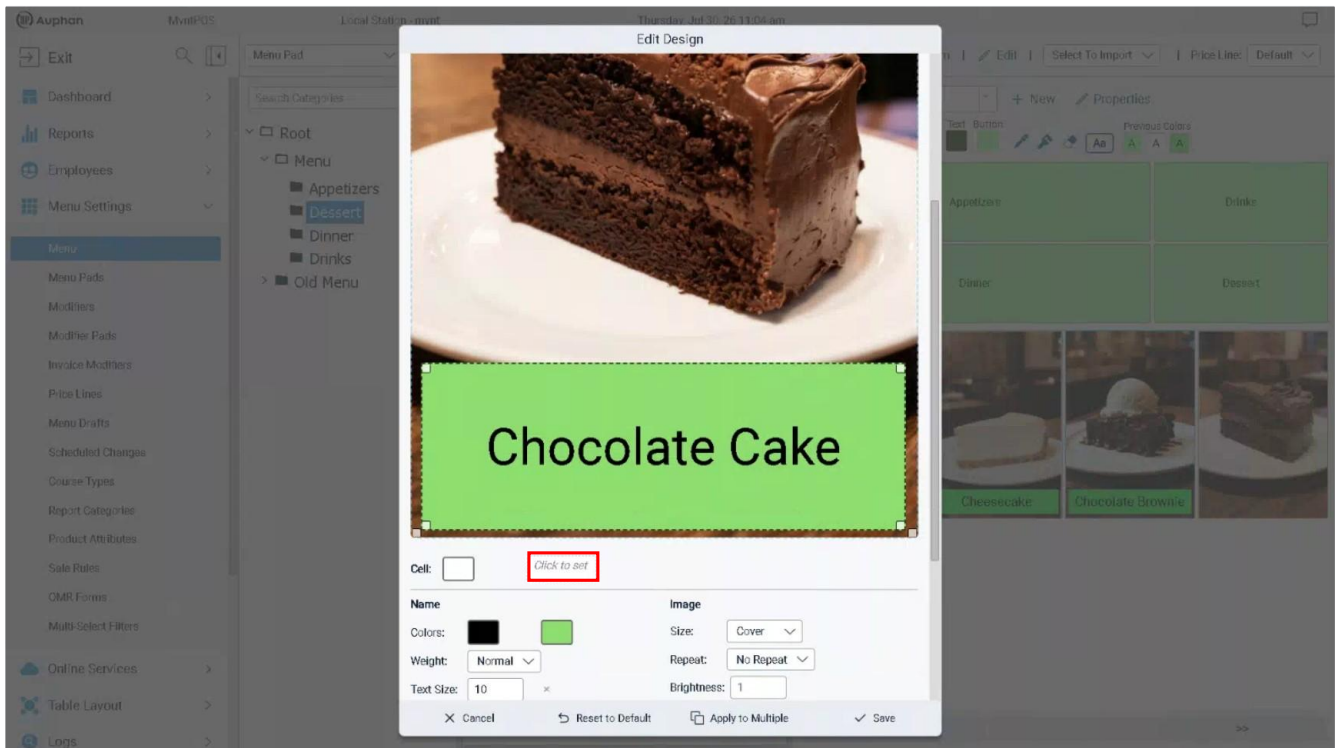

Position and resize the text box to the appropriate space on the Icon.

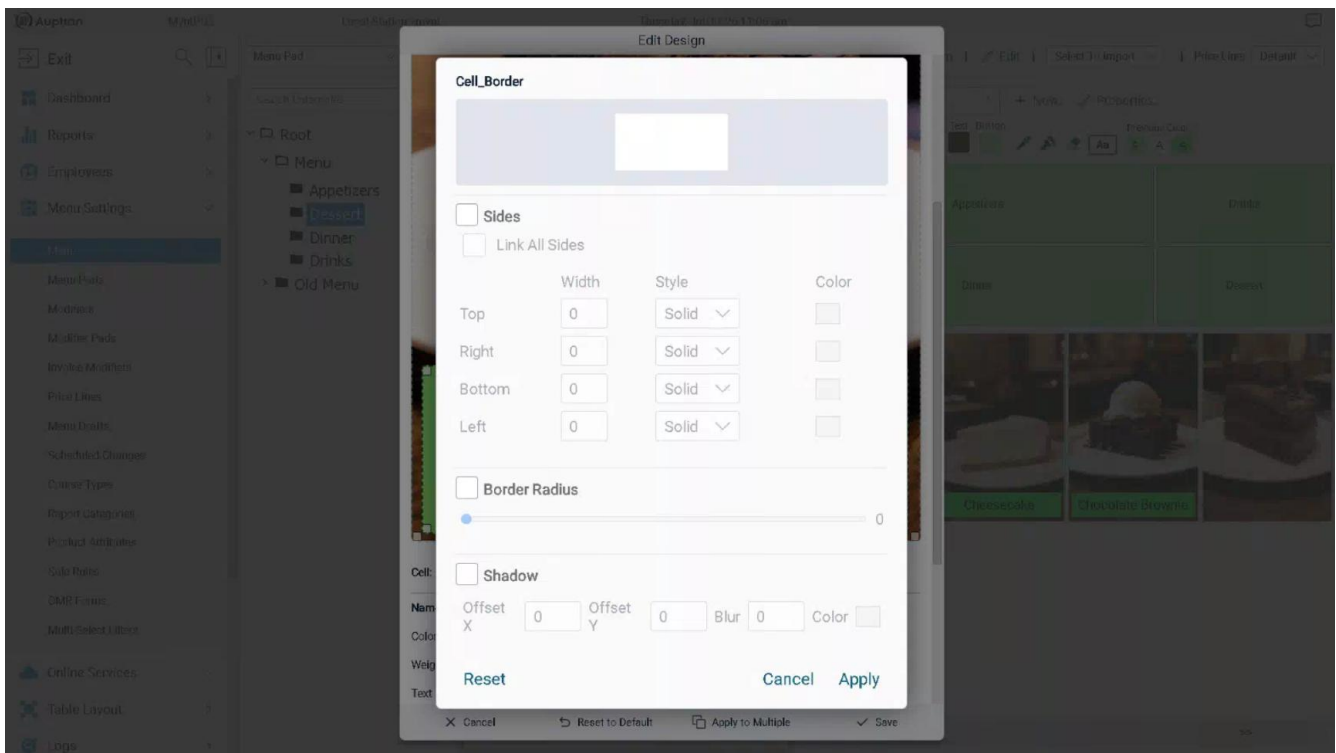

The screenshot displays the Mynt POS menu editor. On the left is a sidebar with navigation options: Reports, Employees, Menu Settings, Menu (selected), Menu Pads, Modifiers, Modifier Pads, Invoice Modifiers, and Price Lines. The 'Menu' section is expanded, showing a hierarchy: Root > Menu > Dessert. The main editing area shows a green rectangular item with the text 'Chocolate Cake'. Below this, there are settings for the item: Name (Chocolate Cake), Colors (black and green), Weight (Normal), Text Size (10), Radius (0), Text Align (Default), Image (Cover), Repeat (No Repeat), and Brightness (1). To the right of the settings is a preview of the menu layout with categories: Appetizers, Drinks, Dinner, and Dessert. The 'Dessert' category is selected, showing three items: Cheesecake, Chocolate Brownie, and Chocolate Cake. Below the preview is a numeric keypad with digits 1-9, 0, and a decimal point. To the right of the keypad are buttons for '<', 'Clear', and 'Enter'. At the bottom of the interface are buttons for 'Cancel', 'Reset to Default', 'Apply to Multiple', and 'Save'.

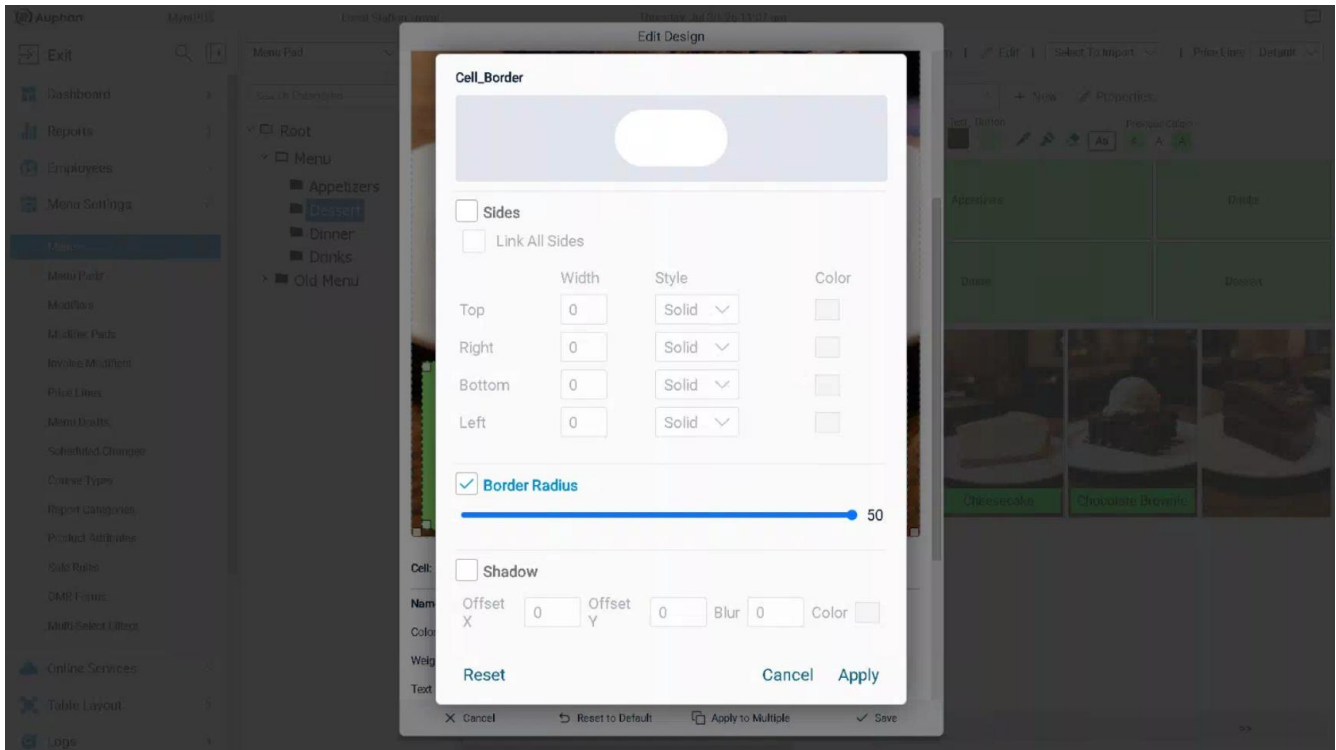

Adjust the Text size as necessary.

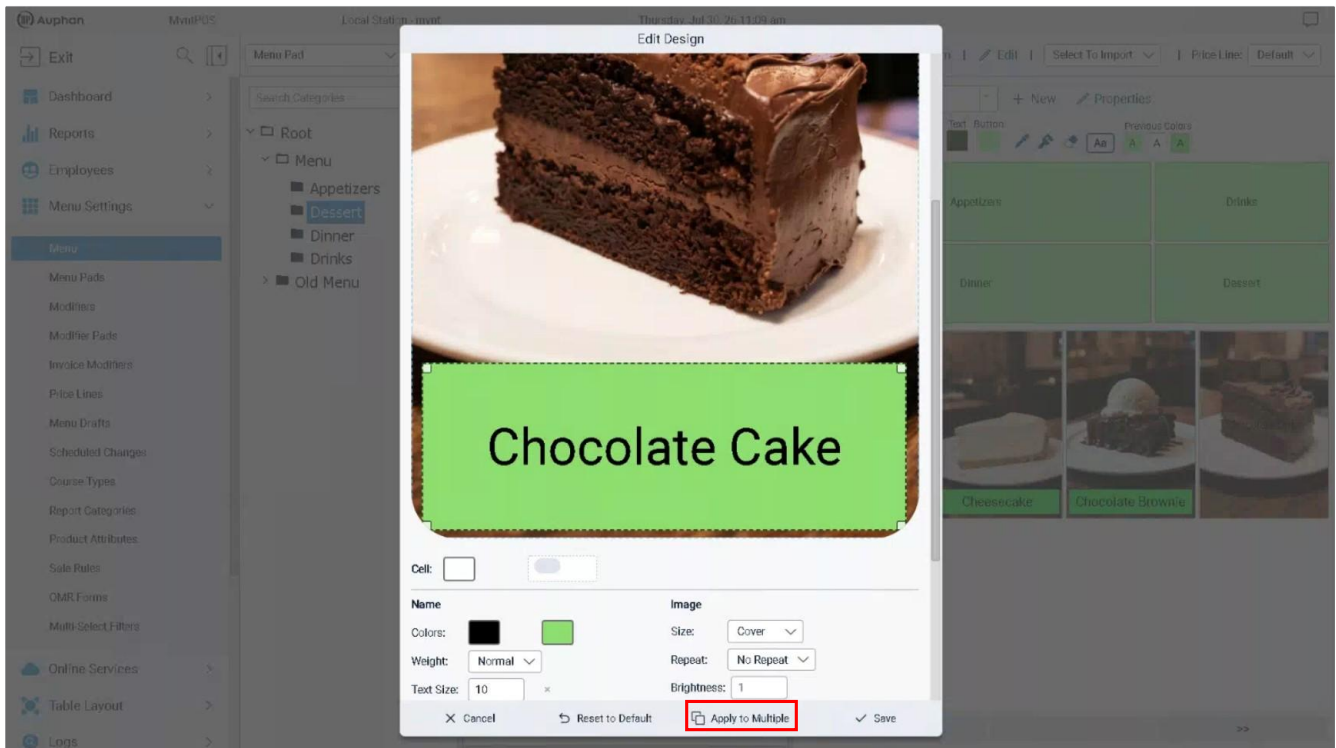

If you would like more of a rounded edge for the icon, press the “Click to set” button to the right of Cell.

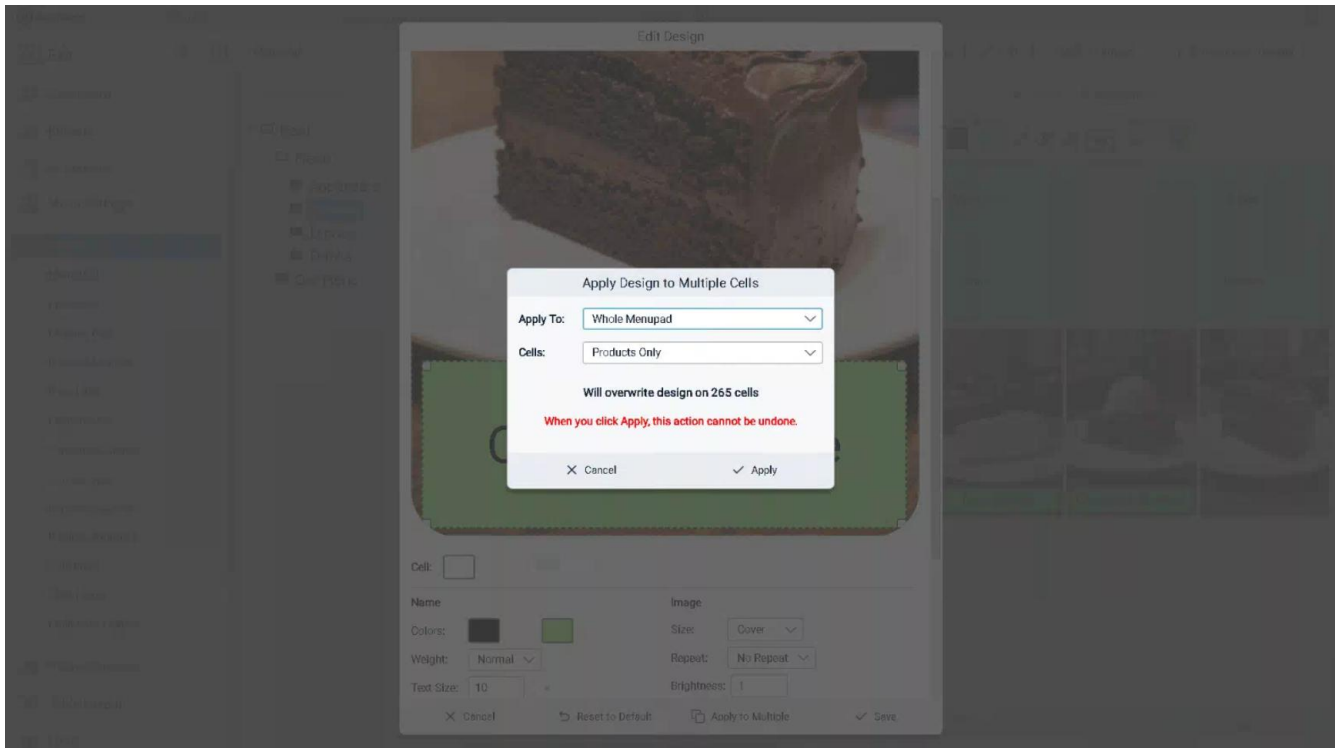

Here, you can edit the icon in multiple ways. For this demonstration, check the “Border Radius” box, and move the slider all the way to the right for more of a rounded edge.

Apply the Cell changes.

Once we are happy with the changes made, we can either Save this item individually, or use the “Save to Multiple” feature, and apply this to an entire category, or the Menu Pad as a whole.

IMPORTANT NOTE: All steps shown can also be applied to Category icons. Experiment around until you find the perfect theming for your business, but do note that all changes are permanent and cannot be undone.
